POST-IMPLEMENTATION WLAN VALIDATION SURVEY
FOR SYSTEM INTEGRATORS

Ensure Your Wireless Network Performs at Its Best: Trust Our Post-Implementation Validation Survey to Verify Your Access Point Installation Meets Design Standards

Why Conduct a Post-Implementation WLAN Validation Survey?

Identify any issues affecting network performance after installation
Ensure that the WLAN system meets design specifications
Provide valuable feedback for future WLAN planning and optimization

Components of a Post-Implementation WLAN Validation Survey:

Coverage analysis
Throughout testing
Noise level analysis
Signal strength analysis
Interference analysis
Benefits of Conducting a Post-Implementation WLAN Validation Survey:
Improves WLAN's overall performance
Ensures a seamless experience for end-users
Identifies and addresses issues affecting network performance
Helps to make informed decisions about network upgrades, equipment placement, and other key factors that impact

KloudWIFI: Your WLAN Solutions Partner

Extensive experience in delivering reliable and high-speed wireless solutions since 2010
Certified staff (ECSE Design, CWNA, and CWDP)
Equipped with various survey tools and necessary accessories

Completed 1 million square feet of Validation survey work for several system integrators, distributors, and OEMs

Contact us today to schedule a post-implementation WLAN validation survey and optimize your WLAN system's performance!
